

WHY CHOOSE THE HAMILTON KITCHEN COMPANY?

We differentiate in many, many ways from our competition. Here are just some of the differences:

We believe attention to detail is imperative! Design, Presentation, Build Quality, Services, Installation & Customer Service throughout your journey.

OUR DESIGNS

All our designers are highly trained installers, with years of experience in their field. We can see any potential hurdles, the solutions required, which in turn ensures your kitchen will work perfectly the first time, which in turn negates the cost of remodelling or having to settle for “that will have to do”.

Our design team, other than having their own artistic flair, regularly keep on top of industry trends and designs, and work regularly with interior designers and architects.

99% of our product is available in made to measure, without the price tag! This gives us almost unlimited design capabilities and options.

This combination means that we can design almost anything you desire, maximise all the space available, truly deliver you ideals and not have to compromise.

We use arguably the best software on the market, making your space come to life in HD photo quality rendering, to give you the best possible idea of what your kitchen will look like before works commence.

QUALITY MANUFACTURE

We use an excellent cabinet manufacturer, excellent door manufacturers, and excellent appliance, worktop and accessory manufacturers. Why? That's what these guys do, and they're very good at it. Their products are tried, tested, and meet all, if not exceed all the industry standards.

OUR CABINETS

Our cabinets are the backbone to your kitchen, are 18mm throughout and manufactured to our design and build specification. They are made to order, and delivered to site in as little as an unrivalled 3-week lead time.

Our entry level cabinet is made from a superior board that is high density chipboard, sandwiched between MDF, sandwiched between melamine. This board quality cuts cleaner, is sturdier in construction, and stronger for fixings and hinges. It's built to last!!! We also use a colour coded edging strip to the front of the cabinets to stop any contrasting colour from the cabinet bleeding through the gaps between the doors, and we only put hinge and shelf holes in the places required. Attention to detail!!

- We have 35 plus colours in our MFC cabinet range.
- We have Hardwood Veneered MDF cabinets. These can be supplied sanded, lacquered or spray painted.
- We have Lacquered Birch Ply cabinets.
- All available in Made to Measure.
- All Made to Order.
- All come with a 25-year warrantee

All our cabinets are made from the world's leading board manufactures:

OUR KITCHEN RANGES

Our range is quite immense. From contract kitchens to designer kitchens, to traditional shaker, In-Frame 1909™, and our own Bespoke Hamilton Artline Furniture. We have all your budget and specification needs covered.

Please follow these icons to our website for our latest brochure, and social media recent projects:

HAMILTON ARTLINE

Many of our kitchens can be designed and manufactured, including made to measure through our main suppliers. However, for those who desire furniture that is quite special and unique, we have the Hamilton Artline service. This is where beautiful design and handmade craftsmanship collaborate to produce exquisite and individual showpieces.

We are independent. We do not choose one supplier, manufacturer or brand over another, all have to meet strict in-house quality re-assurance, as well as FIRA industry standards. We select the right products and services for your project.

INSTALLATION

We have 6 installers working for the company, all of which are specialists kitchen installers. The combination of these guys and the company's management installation experience means that our install standards are exceptional.

Please look at our social media for a portfolio of the quality of our works:

OTHER SERVICES

Kitchen renovations can be stressful, especially if you are living in the property while works are being undertaken. We have a temporary kitchen available to our clients should they have need for it. Additionally, the new normal means that there are still delays on some of your chosen appliances. We have temporary appliances that we loan to our clients to get them through this period until their appliance arrives.

OUR PRICING POLICY

Our pricing policy is to provide superb kitchens at unrivalled value for money. We do not need to run "50% OFF" sales, because our pricing is great from the start, all year round. Please see our last price comparison against Which? number 1 kitchen manufacturer.

In summary - Our last competitor price survey found that we were cheaper than Magnets in their 50% off sale, for a better quality of product, better design, bespoke detailing, and included made to measure.

Made to measure without the price tag.

We price match our appliances to the internet big boys (AO, John Lewis etc), so no need to look elsewhere!

Nothing but genuine 5* reviews on Trustpilot, Google and Facebook – and we're happy to put forward references should you have any doubt!!

It is for the above reasons that we believe our offering is unrivalled, and your home deserves a Hamiltons Kitchen.

So, when we coin "Better by design..." we also mean better build quality, service, installation and price!
